

Charging & Operation

Charging Port
SIM Card Slot
On/Off Switch

The tracker should be charged before each use and periods of storage. Only use the original USB cable provided with the tracker to charge. A charging plug rated at 5V/2A is recommended to charge the tracker.

Charging can take up to 4 hours but must not exceed 6 hours. Never leave the device unattended while charging.

GSM LED (Orange)
Flashing - Device Establishing Signal

Solid - Signal Established

Off - Power off or in sleep mode

GPS LED (Blue)
Flashing - Device Establishing Signal

Solid - Signal Established

Off - Power off or in sleep mode

Using the Device

The easiest way to use the device is to simply place it in the glove box or centre console of your vehicle.

Alternatively, you can use the Adhesive Velcro Pad to mount the device to an internal surface. Ensure the surface is cleared of any grease/debris beforehand.

The Tracker Pouch keeps the device safe and secure. It features loop straps which can be used to mount the device.

To get the most accurate tracking, ensure to mount the device with the Antenna (top side) facing up towards the sky. This will significantly increase it's GPS signal.

On initial power on, the device's Orange and Blue LEDs will begin to flash whilst the device searches for a signal. Once the device has established a fix, these will become solid.

If you have just activated the tracker it can take up to 10 minutes to establish an initial GPS fix. A short journey will allow the tracker to establish a GPS satellite fix quicker.

How do I manage my subscription?

Visit WWW.GPSLIVE.CO.UK, log in and follow the instructions below:

Click on Billing
In the top right corner

Click on Subscribe
on the device you wish to
activate or extend

Proceed to the
payment
screen

IF YOUR SUBSCRIPTION RUNS OUT, YOUR VEHICLE WILL NOT BE PROTECTED AGAINST THEFT AND TRACKING WILL BE DISABLED DURING THIS PERIOD.
