1、 Introduction

Product Appearance

 Keep the touch screen away from water. The touch screen may malfunction in humid conditions or exposure to water. Please make sure the docking station is placed on a flat surface, enabling the fans the intake cool air.

Package Contents

The RX-3 Pro Docking Station package contents:

- Docking Station
- Power cable
- RJ45 network cable
- Hard disk lock key
- Factory inspection report

- Use only licensed accessories. Use of unauthorized parts, accessories or cameras with the docking station may cause malfunction and is not covered by the warranty.

Installation of the Docking Station

This device can only be used with the supplied power cable.

Installation steps:

- 1、 Open the Docking station package.
- 2、 Insert the supplied power cable in the power socket.
- 3、 Turn the Docking station ON.

4、 Required power supply : AC 100V --- 220V.

Turn on the docking station power switch, check if the main power indicator lights up normal.

 If the main switch indicator is not properly lit, check if the power cable is inserted properly.

Switching the device On or Off

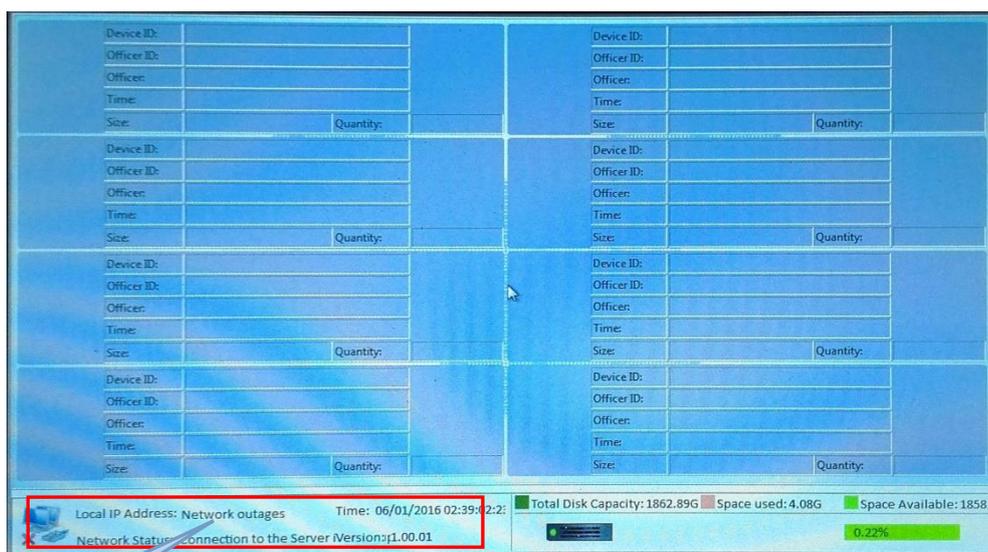

- 1、 When you start the device, press the power switch to turn on the docking station.

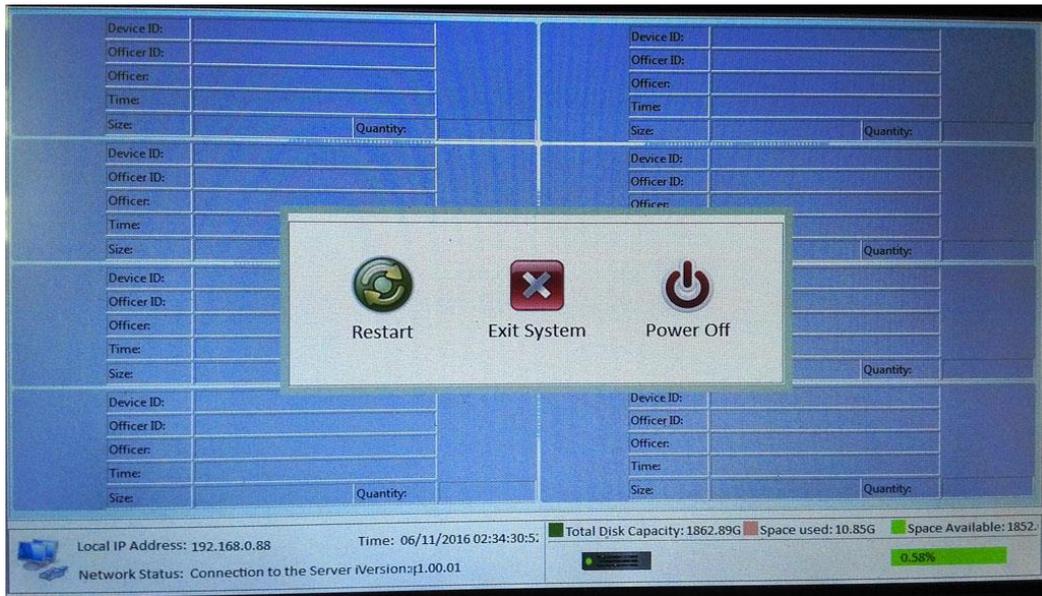

- 2、 To reset the device, press the "Reset" button.

- 3、 If you want to switch off the docking station from software, click on the lower left corner of the screen by your finger and navigate to the Control Panel and click "Power Off".

Click Here

Control Buttons on the Screen:

Restart: Restart docking station system.

Exit System: Exit the docking station system and enter desktop of the operate system.

Power Off: Switch the docking station OFF.

2、 Overview

Description

The Docking Station uses high-performance low-power system, processor and hard drive with high, stable performance. It supports eight body cameras to charge and upload data at the same time. The Docking Station comes with a Web management system, allowing the users to easily playback files and download files using a PC.

Features

- Compact design with integrated hardware.
- Embedded operating system and Web management system.
- Large-capacity hard disk storage space to store data.
- Supports Microsoft Azure cloud for saving and storing the video files.

Specifications

Hardware Configuration	Screen Size	7 Inch
	Display brightness	50
	Display Contrast	50
	USB2.0	≤8 Ports
	SSD	64G
	Hard disk	2T~4T
Software Configuration	Operating System	Microsoft windows 7 Embeded
	Application	Docking Station Management System for Web
Size	Dimension	36*26*12 (cm)
	Weight	6.7KG
External Interface	Power Interface	AC 100V---220V
	Network Interface	RJ45
	External USB Interface	2 Ports USB 3.0

Performance

Boot operate system: <=30 s

Storage: 64G SSD for system, >=2T hard disk for storing video file.

Support camera : Supports 8 body cameras to sync and recharge at the same time.

Screen Resolution : 1024 x 600

Data transmission speed : >300M/min.

Software Features

- 1) **Product Compatibility** : Rewire Security RX-3 Body Worn Camera.
- 2) **Video files can be automatically uploaded** : After inserting the RX-3 body camera in the docking station, all files saved in the body camera TIF card will be automatically uploaded to the docking station and uploaded files are automatically associated with the corresponding information officers.
- 3) **Automatic time synchronization** : After inserting the RX-3 body camera in the docking station, Time of the body camera will be automatically synchronized with the time of the docking station.
- 4) **Auto clear camera TIF card** : After all files in the body camera are uploaded to the docking station, the docking system will clear the storage of the RX-3 Body worn camera.
- 5) **Fast charging** : After inserting the RX-3 body camera in the docking station, the docking station will automatically start recharging the body camera.
- 6) **Search Files** : Authorized users can search files using the docking station based on the type of media (date, time, video, audio, photos, log, HD, SD) to quickly locate video files.
- 7) **Playback files** : Authorized users can playback files using the web interface.
- 8) **Protect files** : Protected files can't be removed by an unauthorized user.
- 9) **Lock files** : Locked files can't be played back, downloaded or removed by an unauthorized user.
- 10) **Protected file transfer** : If the files transfer process is interrupted (USB disconnect etc.) the upload process will continue without damaging the video files.

-
- 11) **Download files** : You can download the files from the docking station using the web system, and save the downloaded file to any storage of your choice.
 - 12) **Automatic management docking station disk space** : The docking station can automatically delete the expired files for making room for the next upload operation.
 - 13) **Cloud storage** : The docking station is embedded with the Microsoft Azure cloud services, you can upload the important files to the Microsoft Azure cloud , However, user needs to open a Microsoft's cloud services account.
 - 14) **Remote manage docking station** : You can manage the docking station remotely by web system.

3、 Basic Features

Using the touch screen

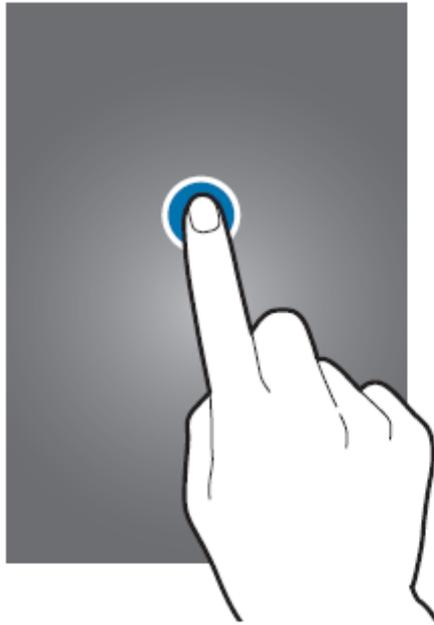

Only use the touch screen by pressing your finger!

- **Do not allow the touch screen contact with other electronic devices. Electrostatic discharges can cause the touch screen to malfunction.**
- **Do not allow the touch screen to contact water. The touch screen may malfunction in humid conditions or when exposed to water.**
- **To avoid damage to the touch screen, do not use any sharp objects on the touch screen. Avoid pressing your finger heavily on the screen.**

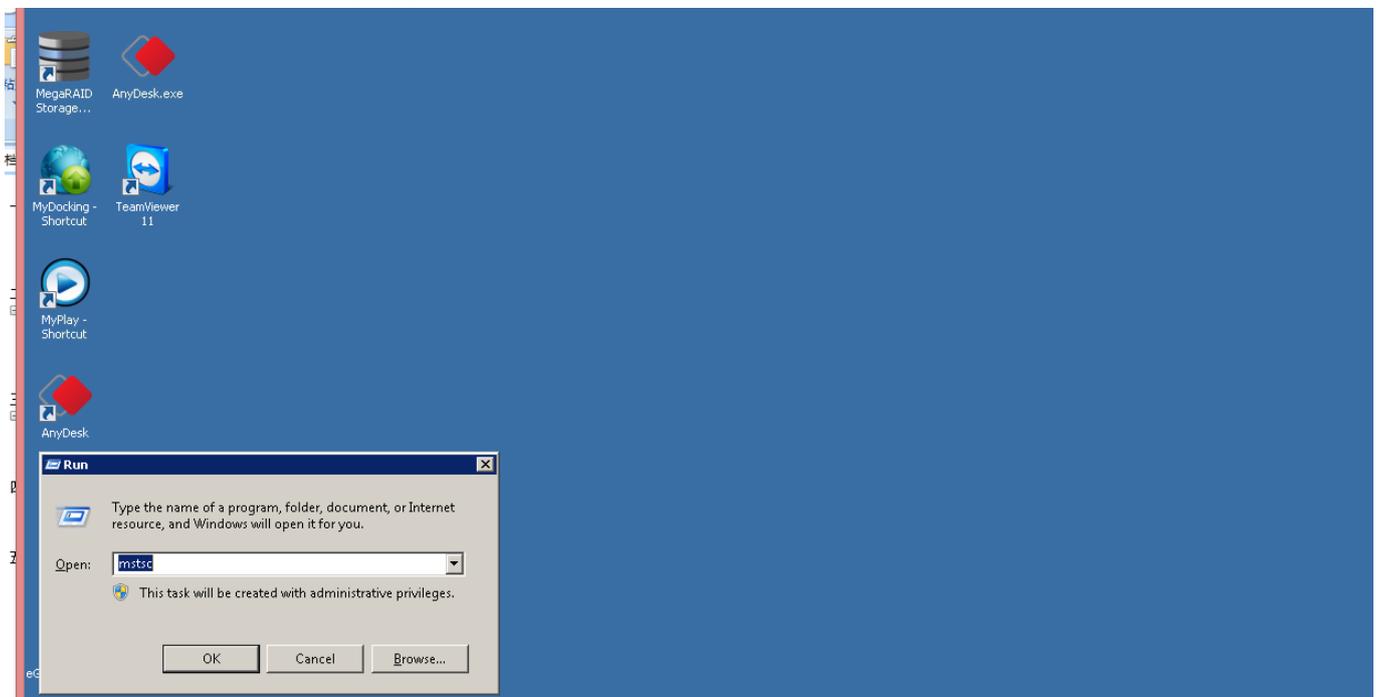

Touch screen gesture

While using the touch screen, interact with the software just like any other touch-screen enabled device such as a smartphone. Press on the icons with your finger to navigate the menus.

How to access the docking station remotely

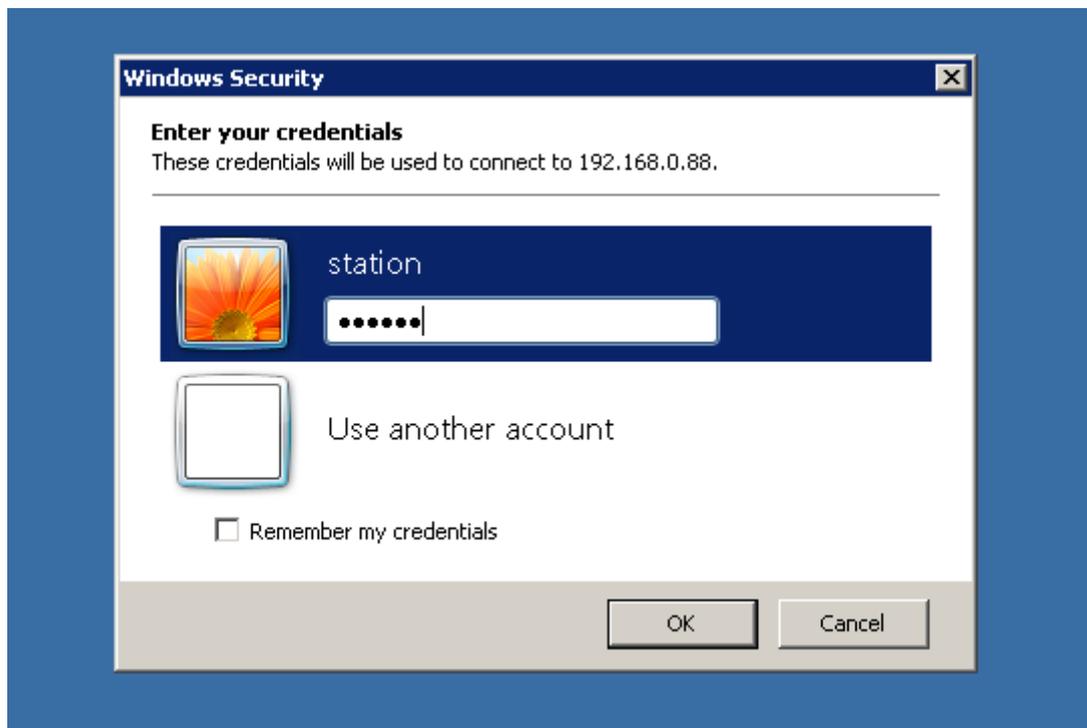

- 1、 Run the remote desktop application "mstsc" on your windows PC.

- 2、 Enter the docking station's IP address in computer Remote Destop application;

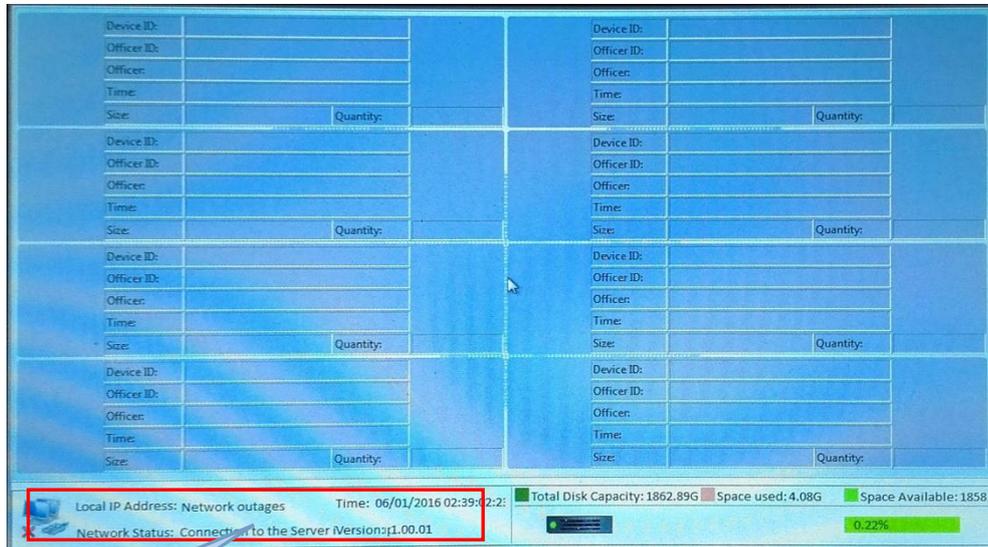

3、 Enter user name : "station" and the default password is "zb2017", then click "ok" button.

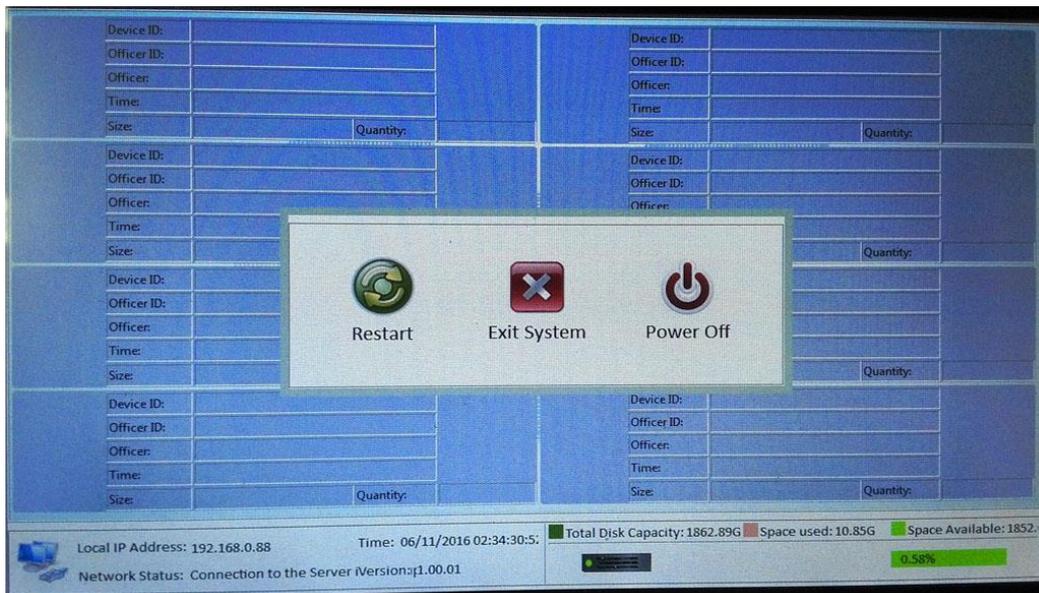

How to set static IP address for the docking station

1、 Please click the lower left corner of the screen and display the control panel, then please click button "Exit System"

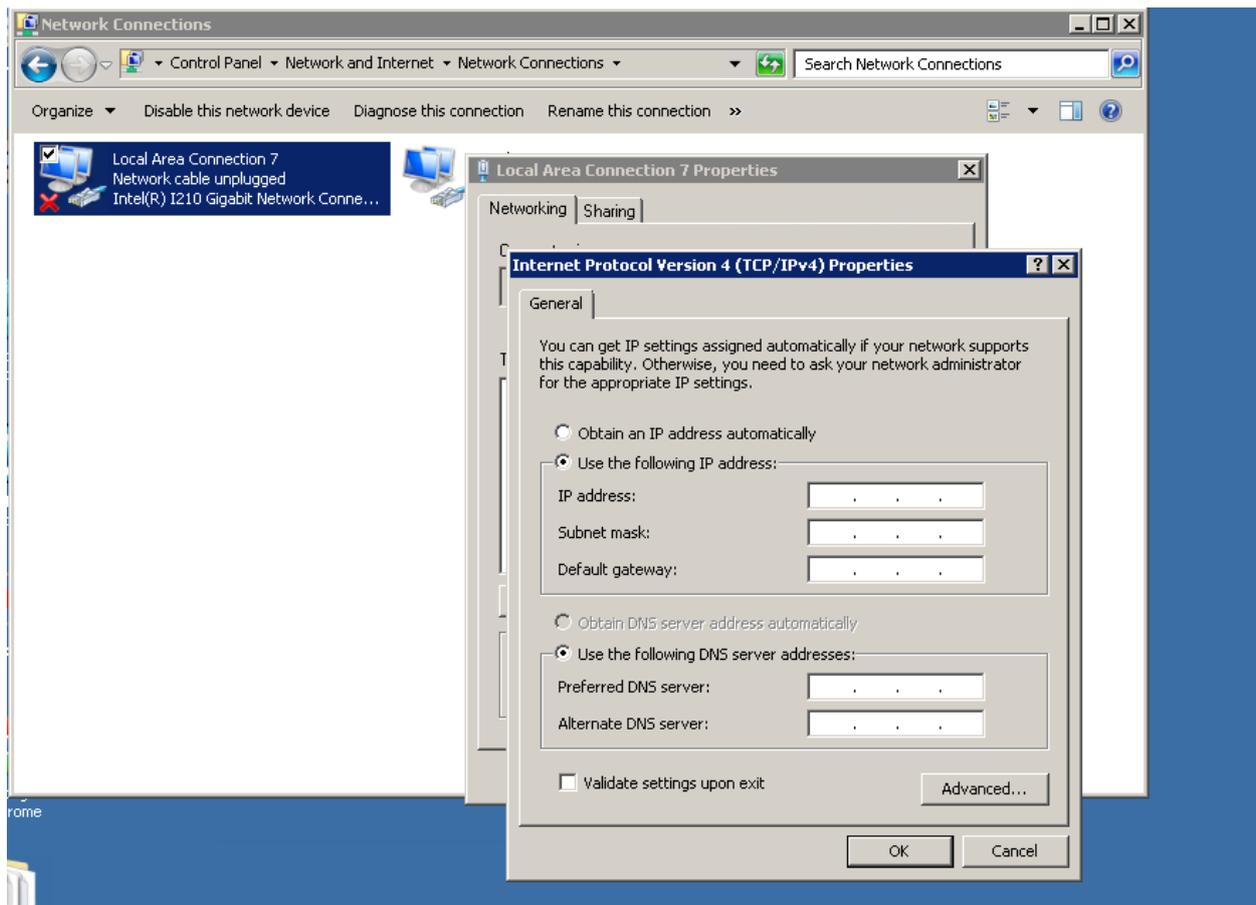

Click the zone

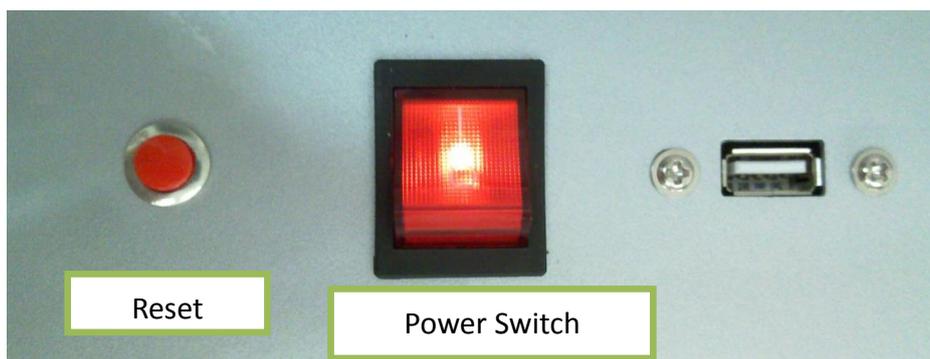

Please select "Exit system" button, then enter default password "2015", you will be sent to the windows desktop.

 While on the windows desktop, navigate to "Control Panel-->Network and Internet--->Network Connections", and locate the network adapter and setting properties.

Turn ON the docking station

1. Plug in the power , and press the docking station "Power Switch" button.

2. After switching the docking station on, the software will automatically start in 20 seconds, once it's ON enter the docking station system interface.

Plug in the RX-3 body worn camera

Upload Data

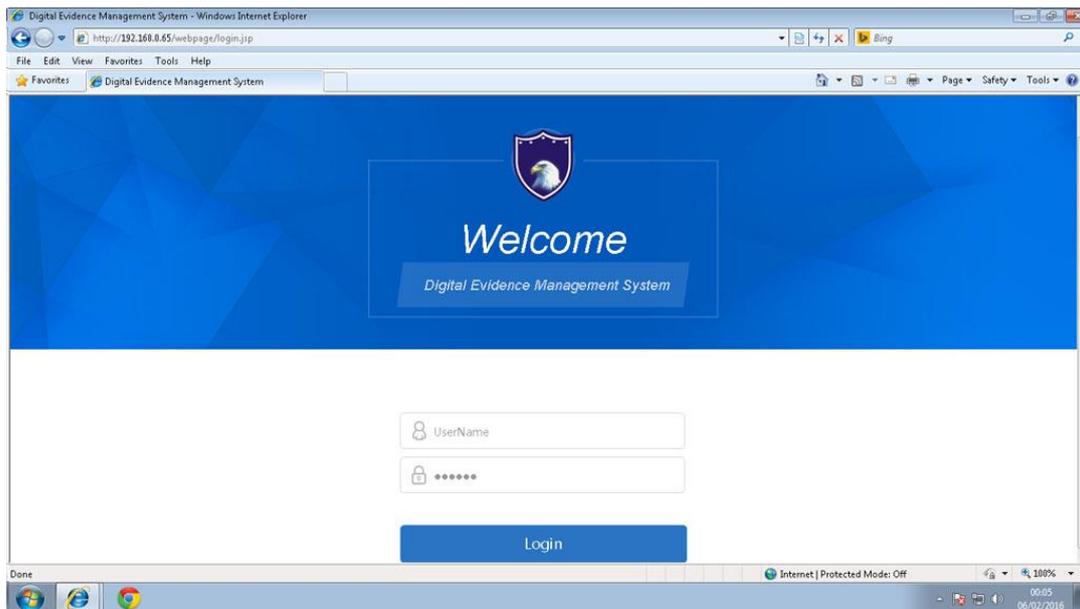

The docking station system will automatically mount the body camera on the interface and start downloading all files from the RX-3 Body worn camera.

5、 Docking station management system

Login system

1、 Enter the docking station IP from any browser on a PC which is **located in the same local network**, and enter the user name and password ,then you will be able to access the docking station management system.

 The administrator account is "admin" and the default password is "888".

Please click the video thumbnail and you will be able to playback the video files

 If you have not installed the adobe flash plug-in in your PC, You have to install the flash plug-in to be able to view the video files.

You can also display a list of files by clicking on "Review files"

About Permission Definition

- Lock

Officers with this permission are allowed to access and playback locked files, but not allowed to unlock and delete locked files.

- Unlock

Officers with this permission are allowed to access, playback, unlock and delete locked files.

- Protect

There is no need for this permission. Officers with or without this permission are both allowed to access and playback protected files and not allowed to unprotect or delete protected files.

- Unprotect

Officer with this permission are allowed to access, playback, unprotect and delete protect files.

For Operation & Behavior

There are four checks on the files, they are Lock, Unlock, Protect and Unprotect. Each of them should be disabled or enabled according to the login officer's permission. Once the permission flags are assigned to files, it should be activated right away.

The screenshot displays the 'Digital Evidence Management System' interface. The top navigation bar includes the system name, a user profile icon, the text 'Welcome admin | 06/02/2016 15:17:27 Thu', and search and power icons. The left sidebar contains a 'Navigator' menu with options: Features, Review Files, Division, Personnel, Docking Station, Reports, and System. The main content area is titled 'Review Files' and includes search filters for 'Date Uploaded', 'Office ID', and 'Device ID'. Below these filters is a 'Department' dropdown set to 'XX Division' and a 'Play List' table. The table has a toolbar with icons for Lock, Unlock, Play, Protect, Unprotect, Remove, Download, and Export. The table columns are: Min, Resolution, Device ID, Impt Level, Main Task, Subtask, File Type, Size(MB), Date Uploader, IsLock, Protect, Uploaded Clox, Case ID, Memo, and operate. The table contains 19 rows of data. A blue arrow points to the 'Detail' link in the 'operate' column of the 12th row. The bottom of the interface shows a pagination control for 'Page 1 of 1' and a status bar indicating 'Displaying 1 to 19 of 19 items'.

Security

Please click "Security" menu, this will take you to the security feature window, here you can create a user and assign permissions to any user.

The screenshot shows the Digital Evidence Management System interface. The top navigation bar includes the system name, a user profile icon, and the text "Welcome admin | 06/02/2016 15:31:13 Thu". The left sidebar contains a "Navigator" menu with options like Features, Reports, System, Security (highlighted with a red box), Options, Setting Cloud, Setting Docking, and Upload Policy. The main content area has a breadcrumb trail: Home > Division > Personnel > Docking Station > Reports > Log > Security. Below this is a search bar with "User No:" and "User Name:" fields and a "Quick Search" button. The "User List" table is displayed with the following data:

	<input type="checkbox"/>	User No	User Name	Department	Availabel
1	<input type="checkbox"/>	admin	administrator	XX Division	yes
2	<input type="checkbox"/>	123	dd123	XX Division	yes
3	<input type="checkbox"/>	4444	4555	XX Division	yes
4	<input type="checkbox"/>	5555	ssss	XX Division	yes

At the bottom of the table, it says "Page 1 of 1" and "Displaying 1 to 4 of 4 items". On the right side, there is a "Permissions Setting" panel with a "Save Setting" button and a list of permissions with checkboxes.

 After you select a permission, please click the "save Setting" button.

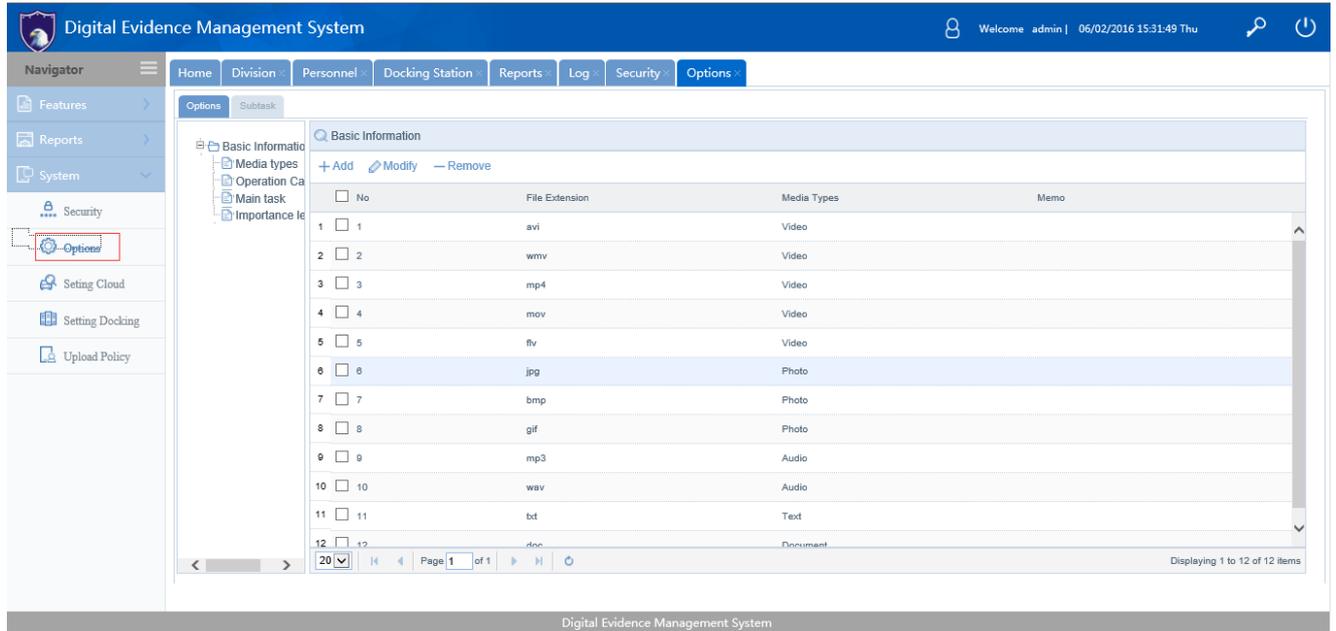

This screenshot shows the same interface as the previous one, but with a red arrow pointing to the "Save Setting" button in the "Permissions Setting" panel. The breadcrumb trail is now: Home > Division > Personnel > Docking Station > Log > Reports > Options > Setting Cloud > Setting Docking > Upload Policy > Security. The "User List" table now contains 5 items:

	<input type="checkbox"/>	User No	User Name	Department	Availabel
1	<input type="checkbox"/>	admin	administrator	XX Division	yes
2	<input type="checkbox"/>	333	333ww	XX Division	yes
3	<input type="checkbox"/>	444	444mm	XX Division	yes
4	<input type="checkbox"/>	mhyten	mhyten	XX Division	yes
5	<input type="checkbox"/>	test	test	XX Division	yes

At the bottom of the table, it says "Page 1 of 1" and "Displaying 1 to 5 of 5 items". The "Permissions Setting" panel on the right has a "Save Setting" button highlighted with a red box and a red arrow pointing to it from the table area.

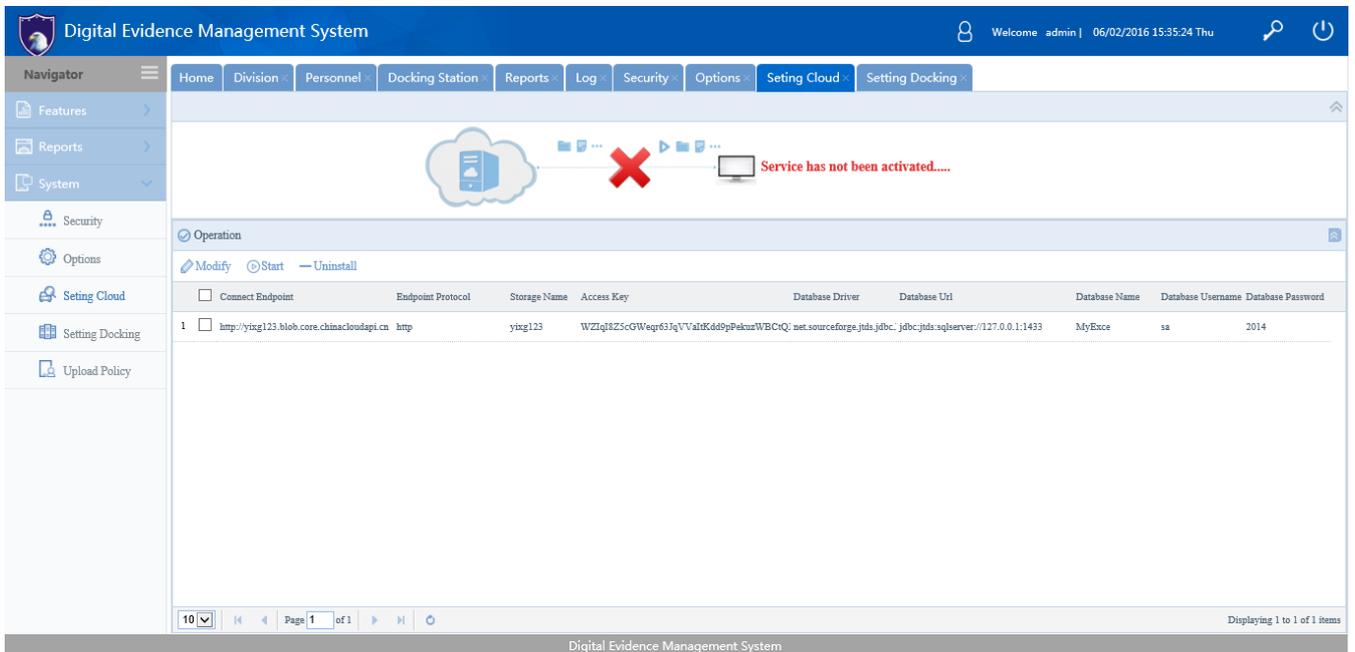

Options

Please click "Options" menu, this will take you to the options feature window, here you can set system basic options.

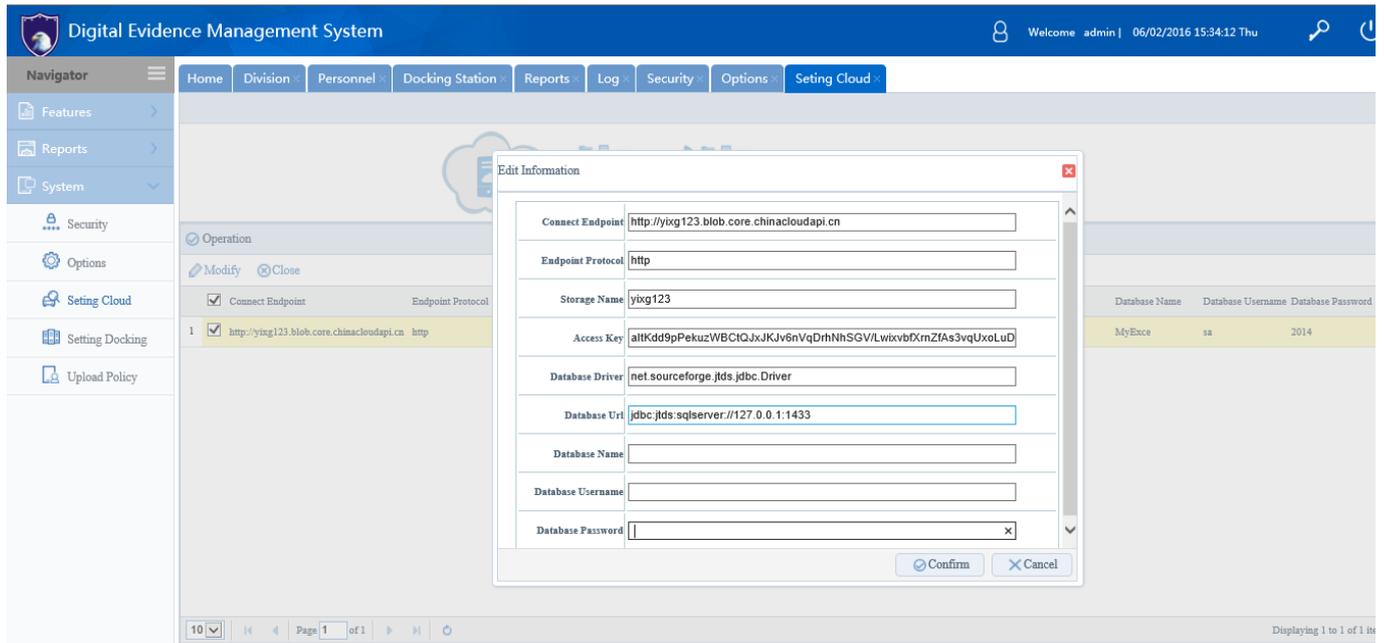

Storage Cloud Services

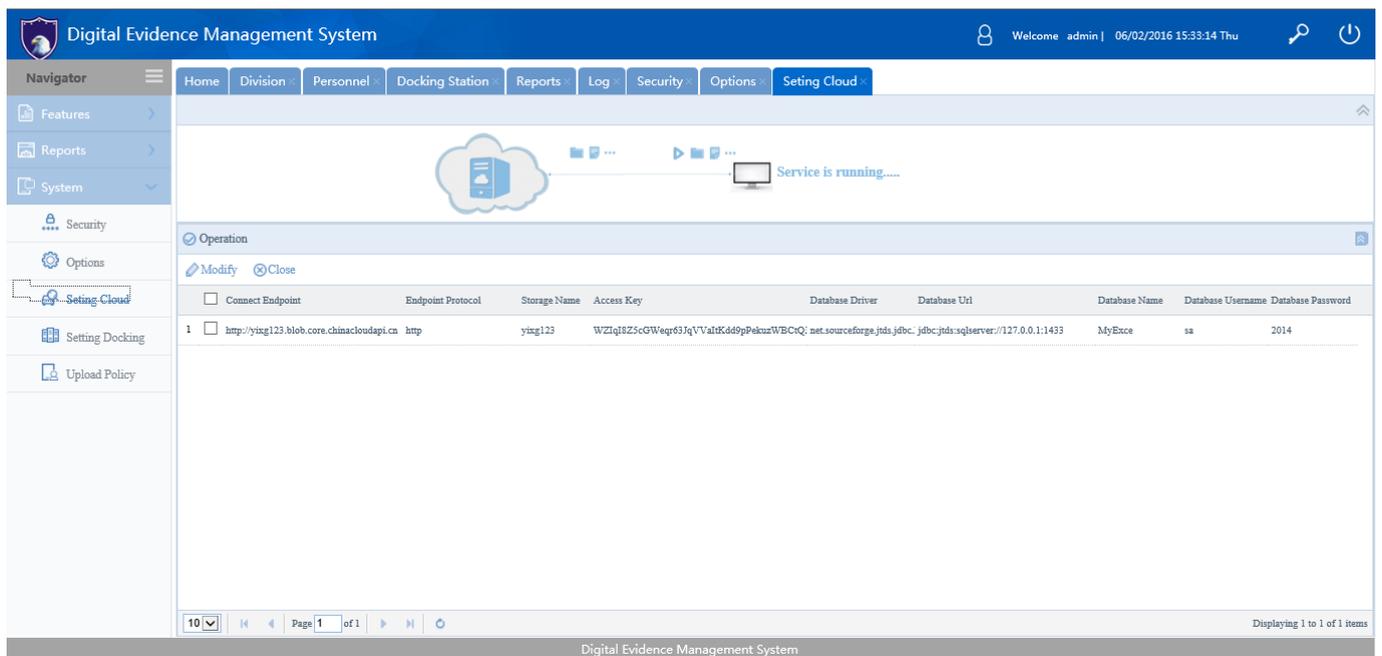

Please click on the "Setting Cloud" menu, this will take you to the setting storage cloud service feature window, here you can set Microsoft Azure cloud service account access options and install the cloud service.

Cloud address and account and access key will be provided by Microsoft Azure cloud.

After starting the cloud service, the service can automatically upload files to Microsoft storage cloud.

 The docking station system only supports Microsoft Azure cloud for storing the files on the cloud.

Setting docking menu

Please click "Setting Docking" menu, this will take you to the Setting Docking feature window, here you can set options of docking station.

The screenshot shows the 'Digital Evidence Management System' interface. The top navigation bar includes 'Home', 'Division', 'Personnel', 'Docking Station', 'Reports', 'Log', 'Security', 'Options', 'Setting Cloud', and 'Setting Docking'. The left sidebar contains a 'Navigator' menu with options: Features, Reports, System, Security, Options, Setting Cloud, Setting Docking (highlighted with a red box), and Upload Policy. The main content area displays a table for 'Docking Manage' with columns for Name, Value, and Memo. The table lists 10 settings, including Language, AppName, IsCloud, IP, Port, IsMonitor, IsHideDesktop, IsDelFiles, UsbPort, and IsUsbPass. The 'Setting Docking' menu item in the sidebar is highlighted with a red box.

6、 Troubleshooting

Touch Screen

If the touch screen is not responding properly, try the following:

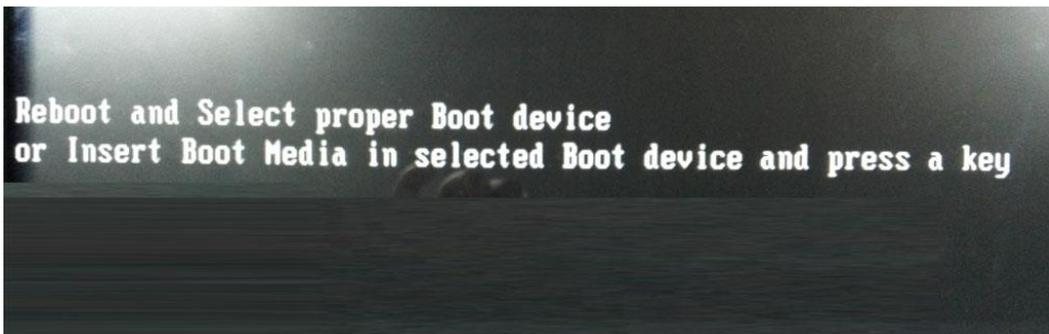

- Remove any protective covers from the touch screen. Protective covers may prevent the device identification or lead to incorrect input, we do not recommend the use of touch-screen devices with the protective film.
- Make sure to click the touch screen when fingers are clean and dry.
- Restart the device to clear any temporary software bugs.
- Make sure the LCD driver is operating normally.
- If the touch screen is scratched or damaged, please contact Rewire Security.

Network

- 1、 If you can't connect the docking station, please check the RJ45 network line if it's inserted properly.
- 2、 Enter the window desktop, and open LAN card properties, And check if the IP Address is available.

System

- 1、 If operate system of docking station can't boot, and if the screen shows this message:

It means the operating system boot files is damaged, please contact Rewire Security.

Storage

1、 Docking station comes with a hard disk, and it can store files from body camera. If the hard disk is full, you can erase the files inside or change the disk by opening the lock beside the docking station using the supplied key, and get out the hard disk, and insert a new hard disk.

2、 If you wish to erase the files inside the disk, enter the windows computer management, then select the docking station storage disk from the menu and click on format hard disk.
